

K-BORD® E

Composition

Phenolic paper based laminate having on both sides a epoxy glass layer. The thickness of the glass layer is approx. 0,10 mm. The colour of the sheets is dark brown, the surface is mat.

Application

K-BORD® E is used for matrices in card box production.

Properties

- Glasslayer on the surface for enhanced durability
- Plane laminate due to symmetrical composition
- close thickness tolerances

Availability

Thickness (mm):	0,4 - 0,65	0,7 - 0,75	0,8 - 0,9	0,95 - 1,0	1,1-1,2
Zolerances (mm):	+0,025/-0,025	+0,03/-0,03	+0,04/-0,03	+0,04/-0,04	+0,05/-0,045

Sheet size: 1060 x 1060 mm
Tolerance: + 10 / - 0 mm

Cut panels can be supplied upon request.
